About Me

OBJECTIVE

A detail-oriented full-stack web developer who designs, builds, and deploys complete web applications end to end — from first concept to a fast, polished, production-ready site. Looking to bring clean interfaces, solid backends, and secure delivery practices to a team or client project.

WORK EXPERIENCE

- Freelance Web Developer** 2024 – Present
Self-Employed · Remote
 - %, Design and develop custom websites and web applications for clients across industries — handling UI/UX design, development, and deployment end to end.
 - %, Deliver responsive, performant, visually polished digital experiences on Vercel, with custom domains and production monitoring.
 - %, Manage the full client lifecycle: requirements, design feedback loops, launch, and post-launch support.
- Project Debugging & Code Support** March 2026
2nd-Year IT Students · Bugo, Cagayan de Oro
 - %, Traced and fixed JavaScript and Python errors blocking a school POS project; resolved Firebase database issues.
 - %, Walked the team through the root cause of each bug so they could debug independently going forward.
- Front-End Developer — Personal Projects** 2024 – 2025
Personal Projects & Open Source
 - %, Built and shipped tools for government data automation, portfolio sites, and interactive web experiences.
 - %, Focused on clean architecture, responsive design, and modern CSS (animations, glassmorphism).

PROJECTS

- DENR Tools** Next.js · TypeScript
Custom web app for the Department of Environment and Natural Resources automating repetitive data tasks — improving operational efficiency and cutting manual processing time.
-> [denr-tools.vercel.app](#)
- Schedlify** Next.js · TypeScript
Weekly schedule planner with image/PDF export, built for students and planners.
-> [schedlify.vercel.app](#)
- Motor Shop Inventory** React · Supabase
Secure inventory management system with authentication for motor shop operations.
-> [motorsample.vercel.app](#)
- ZirconAI** Next.js · AI
Experimental AI chatbot with natural language processing and context-aware responses.
-> [zirconai.vercel.app](#)
